

The
Fire Marshals Association of Missouri
Presents

Building Construction : A Firefighters Perspective

Understanding the differences in building construction can make the difference between a safe, efficient fireground operation and instant tragedy. This course provides you with up to date tools and information to allow you to distinguish between the different construction types and how fire behavior differs with each. Special attention is paid to the types of construction encountered in your community.

Earn MO Division of Fire Safety CEU's (Inspector & Investigator) while participating in a fast-paced, current, informational presentation on building construction presented *by firefighters for firefighters.*
